## PROFILE

Experienced Software Developer with 3 years of expertise in design, installation, testing and maintenance of software systems. Equipped with a diverse and promising skill-set. Proficient in various platforms, languages, and embedded systems. Experienced with cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

## EMPLOYMENT HISTORY

**Software Developer at TECH KIDZ AFRICA, Mombasa**
November 2017 — July 2022

- Collaborated with the product team to understand requirements and business specifications around portfolio management, analytics and risk.
- Coded software updates and alterations based on detailed design specifications.
- Solved complex problems using the latest in cloud, mobile, and web technologies.
- Developed and presented findings and solutions to audiences including senior executives and stakeholders.

**Junior Software Developer at pwaniteknowgalz, Mombasa**
June 2021 — October 2022

- Addressed and fixed complex bugs.
- Implemented and updated application modules under the direction of Senior Software Developers.
- Worked at an independent level, while also serving as an effective and enthusiastic collaborator.
- Performed automated testing tasks and developed complex features routinely.

## EDUCATION

**Certifcate in Computer Science, Coursera Inc, Mombasa**
September 2022 — July 2023

In this module, you will learn about the different types of web developers and the roles and responsibilities of front-end, back-end, and full-stack developers. You will take a first look at the core technologies of HTML, CSS, and JavaScript and explore the concepts that underpin how the internet works.

**Interactivity with JavaScript, University of Michigan, Mombasa**
August 2022 — July 2023

This course will introduce you to the basics of the JavaScript language. We will cover concepts such as variables, looping, functions, and even a little bit about debugging tools. You will understand how the Document Object Model (DOM) is used by JavaScript to identify and modify specific parts of your page.
